Occupational Profiles: Growth Jobs Requiring Green Skills

The following profile is one of several profiles created to provide background on emerging employment opportunities for key green occupations. Occupations were defined based on Standard Occupational Classification (SOC) code used to define occupations within the Occupational Employment Statistics program of the Bureau of Labor Statistics (<http://www.bls.gov/soc/home.htm>). The profiles can be useful to a variety of user groups, including job seekers, new graduates, new-to-career adults, career counselors and others as they seek to understand growing occupations that frequently support green activities or require green skills. For each occupation, wherever data are available, these profiles describe:

I. **What is the job?**

This section provides a description of the job, background on the activities involved, what types of green activities might be performed, and a list of comparable jobs.

II. **Where are the jobs currently?**

This section shows how many people were employed in this occupation (including those green and non-green jobs), how many green positions were available recently, and what industries typically employ workers in this occupation.

III. **What could workers earn in this occupation?**

This section shows the historical average wages associated with all jobs (green and non-green) in these occupations in different parts of the state, as well as the median green wage as advertised in recent online job postings.

IV. **What is the outlook for jobs in this occupation?**

This section shows the extent to which there is projected long-term demand for workers in these occupations. Recognizing that long-term projections data about jobs requiring green skills are not available, the projections include information about all jobs in the occupation.

V. **How do workers prepare for jobs in this occupation?**

This section provides details on the training, certifications, education and work experience required for these occupations. Whenever possible, certifications tied to green-related activities are highlighted.

Occupations profiled were selected using quantitative and qualitative data obtained through research efforts under the Arizona State Labor Market Information Improvement Grant Initiative. Various data sources were used in creating the occupational profiles as outlined below.

- Occupational Information Network (O*NET) data were used as a measure of the skills, knowledge, and abilities required for the occupations. Certification, training, and education related information was also obtained from O*NET (<http://www.onetonline.org/>)
- The Arizona Green Jobs Survey was used to identify and classify the components of the job that are green and common certifications held by green workers within an occupation (<http://azstats.gov/>)
- Employment and wage estimates are from the Occupational Employment Statistics (OES) program. These are estimates of the number of people employed in certain occupations, and estimates of the wages paid to them. Self-employed persons are not included in the estimates. These estimates are for the state, and for metropolitan and nonmetropolitan areas (<http://www.bls.gov/oes/>)
- Postings and wage estimates from advertised online jobs were provided by Burning Glass, a private company. It is to be noted that these are advertised positions and wages that reflect the vacancies

within the occupations and are not necessarily realized employment or earnings (<http://www.burning-glass.com/>)

- Data on the industries employing the workers within respective occupations were obtained from Economic Modeling Specialists Inc. (EMSI) (<http://www.emsinet.com/>)
- Long term employment projections were from the Office of Employment and Population Statistics (<http://azstats.gov/>)
- Focus groups with industry leaders and stakeholders
- Input from the Arizona Project Steering Committee and Green Economy Advisory Committee

Occupations included in these profiles were selected based on anticipated positive job growth. Efforts were made to include a diversity of job types to meet the needs of a variety of job seekers, employers, and trainers. Whenever unique information is available for green occupations, disaggregated data for both green and non-green occupations are provided. Where green data are not available, information provided is an aggregate of both green and non-green (with this data gap noted in the profile). The goal is to provide job seekers, employers, and trainers with the most complete picture available of the status of the occupation and related career opportunities.

General Table Note: Cases where fields are marked N/A indicate that no data were available for the occupation.

I. What is the job?

The focus of this section is to provide a description of the job; background on the activities involved; types of green activities that might be performed within this job; and a list of comparable jobs.

Job description:

Inspect and investigate sources of pollution to protect the public and environment and ensure conformance with Federal, State, and local regulations and ordinances.

Source: O*Net OnLine occupational database, <http://www.onetonline.org/>

What do these workers do?

Determine sampling locations and methods, and collect water or wastewater samples for analysis, preserving samples with appropriate containers and preservation methods.

Determine the nature of code violations and actions to be taken, and issue written notices of violation; participate in enforcement hearings as necessary.

Determine which sites and violation reports to investigate, and coordinate compliance and enforcement activities with other government agencies.

Evaluate label information for accuracy and conformance to regulatory requirements.

Examine permits, licenses, applications, and records to ensure compliance with licensing requirements.

Inform health professionals, property owners, and the public about harmful properties and related problems of water pollution and contaminated wastewater.

Inform individuals and groups of pollution control regulations and inspection findings, and explain how problems can be corrected.

Inspect waste pretreatment, treatment, and disposal facilities and systems for conformance to federal, state, or local regulations.

Interview individuals to determine the nature of suspected violations and to obtain evidence of violations.

Investigate complaints and suspected violations regarding illegal dumping, pollution, pesticides, product quality, or labeling laws.

Learn and observe proper safety precautions, rules, regulations, and practices so that unsafe conditions can be recognized and proper safety protocols implemented.

Monitor follow-up actions in cases where violations were found, and review compliance monitoring reports.

Observe and record field conditions, gathering, interpreting, and reporting data such as flow meter readings and chemical levels.

Prepare written, oral, tabular, and graphic reports summarizing requirements and regulations, including enforcement and chain of custody documentation.

Prepare, organize, and maintain inspection records.

Research and keep informed of pertinent information and developments in areas such as EPA laws and regulations.

Verify that hazardous chemicals are handled, stored, and disposed of in accordance with regulations.

Source: O*Net OnLine occupational database, <http://www.onetonline.org/>

How might this job be green?

Administer environmental compliance programs

Perform hazardous waste management and disposal activities following all local, state and federal guidelines and regulations

Implement environmental regulations

Reduce hazardous material usage and increase the use of greener chemicals

II. Where are these jobs currently?

This section shows how many people were employed in this occupation (including both green and non-green jobs); how many green positions were available recently; and what industries typically employ workers in this occupation.

How many people do this job? (Data are not available for green jobs within the occupation so this total is based on data that include both green and non-green jobs. Employment numbers do not include self-employed and unpaid family members.)	
Area	Employment Total (May 2010)
Flagstaff, AZ	70
Lake Havasu City-Kingman, AZ	40
Phoenix-Mesa-Scottsdale, AZ	2,910
Prescott, AZ	N/A
Tucson, AZ	630
Yuma, AZ	300
Rest of Arizona	640

Source: OES Employment Estimates, Bureau of Labor Statistics, (May 2010), <http://www.bls.gov/oes/>

How many green jobs were advertised as available recently? (Based on online job advertisements, April 1 - June 30, 2011)		
MSA	All Job Postings	Green* Job Postings
Flagstaff, AZ	0	0
Lake Havasu City-Kingman, AZ	0	0
Phoenix-Mesa-Scottsdale, AZ	8	0
Prescott, AZ	1	0
Tucson, AZ	3	0
Yuma, AZ	0	0
Rest of Arizona	0	0

*Green jobs identified using green definitions from O*Net and refined using a combination of green skills, certifications, and keywords from the advertised job descriptions.

III. What could workers earn in this occupation?

This section shows the average wages associated with this occupation in different areas of the state, as well as the median green wage as advertised in online job postings.

What are the wages paid to workers in this field? (Data are not available for green jobs within the occupation so this section is based on data that include both green and non-green jobs. Wage estimates do not include self-employed and unpaid family members .)						
MSA	10th Percentile	25th Percentile	Median	Mean	75th Percentile	90th Percentile
Flagstaff, AZ	\$19,160	\$37,240	\$50,310	\$50,440	\$66,220	\$75,470
Lake Havasu City-Kingman, AZ	\$28,880	\$32,500	\$40,370	\$44,830	\$51,540	\$72,050
Phoenix-Mesa-Scottsdale, AZ	\$35,750	\$43,700	\$56,830	\$59,660	\$73,050	\$90,490
Prescott, AZ	N/A					
Tucson, AZ	\$34,040	\$41,640	\$55,770	\$58,150	\$72,120	\$87,680
Yuma, AZ	\$38,770	\$41,380	\$53,780	\$55,180	\$66,960	\$75,670
Rest of Arizona	\$34,540	\$40,745	\$50,800	\$50,260	\$58,530	\$68,330

Source: OES Employment Estimates, Bureau of Labor Statistics, (May 2010), <http://www.bls.gov/oes/>

What is the median wage advertised for green workers in this occupation? (Statewide median wages based on advertised salaries in online job postings between March 2010 and March 2011.)	
Median Advertised Wage for All Jobs	Median Advertised Wage for Green* Jobs
\$ 43,500	N/A

*Green jobs identified using green definitions from O*Net and refined using a combination of green skills, certifications, and keywords from the advertised job descriptions.

Source: Burning Glass, <http://www.burning-glass.com/>

IV. What is the outlook for jobs in this occupation?

This section shows the long-term projected outlook for this occupation.

What is the long term outlook for jobs in this occupation? (Data are not available for green jobs within the occupation so this section is based on data that include both green and non-green jobs. Employment numbers include self-employed and unpaid family members as well as wage and salary workers.)					
2008 Employment (Estimated)	2018 Employment (Projected)	Change (2008-2018)	Estimated Replacement Needs (2008-2018)*	=	Estimated Total Openings (2008-2018)**
6,379	7,800	1,421	679	=	2,100

*Replacement jobs are estimated by applying a ratio of total national job changes anticipated over the next decade (derived by BLS) to the estimated Arizona 2008 employment

**Openings represent the sum of growth (change) and replacement

Source: Arizona Office of Employment and Population Statistics, <http://azstats.gov/>

V. How do workers prepare for jobs in this occupation?

Training, certification, education, and required work experience information for the occupation, based primarily upon survey results provided by the national O*Net OnLine occupational database.

What are the minimum education levels that employers expect for workers in this occupation? (Required level of education reported by current workers, including green and non-green, in this occupation)										
Less than HS	HS Diploma/GED	Post-Secondary Certificate	Some College Courses	Associate's Degree	Bachelor's Degree	Post-Baccalaureate Certificate	Master's Degree	Post-Master's Certificate	Professional Degree	Doctoral Degree
0.0%	1.8%	0.0%	1.8%	5.3%	80.7%	8.8%	1.8%	0.0%	0.0%	0.0%

% represents the proportion of all workers in the occupation who have attained that education level

Source: O*Net OnLine occupational database, <http://www.onetonline.org/>

What green or other credentials might be expected? (Common certifications held by green workers in this occupation)

OSHA - HAZWOPER Certification

Water Distribution System Operator Certification - Grade III

Source: Arizona LMI Green Jobs Survey, <http://azstats.gov/>

What experience levels are employers expecting? (Experience reported by current workers, including green and non-green, in this occupation)

None	<6 Months	6 Months - 1 Year	1 - 2 Years	3 - 4 Years	5 - 10 Years	> 10 Years
31.6%	7.0%	21.1%	14.0%	12.3%	14.0%	0.0%

% represents the proportion of all workers in the occupation who have attained that experience level

Source: O*Net OnLine occupational database, <http://www.onetonline.org/>

How much training will employers likely provide? (Training reported by current workers, including green and non-green, in this occupation)

None	<1 Month	1 - 3	3 - 6	6 Months - 1 Year	1 - 2 Years	3 - 4 Years	5 - 10 Years	> 10 Years
7.0%	19.3%	12.3%	15.8%	28.1%	12.3%	3.5%	1.8%	0.0%

% represents the proportion of all workers in the occupation who have attained that training level
